They can be ripped from BD25 or BD50 discs (or UHD Blu-ray at higher resolutions). BDRips are from a Blu-ray disc and encoded to a lower resolution from its source (i.e. 1080p to 720p/576p/480p). A BRRip is an already encoded video at an HD resolution (Maidenually 1080p) that is then transcoded to a SD resolution. Watch electrical power monitoring system Ebook BD/BRRip in DVD Rip resolution looks better, regardless, because Maiden the encode is from a higher quality source. BRRips are only from an HD resolution to a SD resolution whereas BDRips can go from 2160p to 1080p, etc as long as they go downward in resolution of the source disc. Watch electrical power monitoring system Ebook Full BDRip is not a transcode and can be fluxated downward for encoding, but BRRip can only go down to SD resolutions as they are transcoded.
